

STATEWIDE QUALITY SERVICES is committed to protection of the environment and responsible use of our natural resources. **STATEWIDE** is focused on reducing our impact on the environment while delivering our services. We recognize that while each person or organisation should act responsibly in managing our earth's resources, we play an important part in the services we provide our clients, as well as supporting environmental programs initiated by those clients.

Through innovative processes and educating all staff, **STATEWIDE** will continue to minimise any impact to the community; locally or globally. This will be achieved through:

- Complying with all applicable legal and regulatory requirements
- Continuing to advance in use of better equipment and processes that minimize the use of energy and water
- Supporting recycling programs; whether initiated by clients or through our company practices
- Actively using and promoting products that have a positive impact on the environment
- Actively working with like-minded clients and partners
- Conducting our business in a manner that emphasises social responsibility
- Becoming ISO 14001 accredited during 2011
- Actively supporting community based environmental activities

In order to implement the general provisions of this policy, a program of activities and procedures will be set up that include:

- Training and education of personnel at all levels
- Researching and implementing latest environmental processes
- Maintaining equipment and facilities to minimise threat or impact
- Preparedness and containment of all hazardous material handled or transported
- Monitoring and reporting on outcomes of energy reduction, recycling and waste generation

STATEWIDE will continue to review and implement its environmental programs as part of its continuous improvement focus.

15 October 2010

Elias Shamoon
Managing Director
STATEWIDE QUALITY SERVICES PTY LTD

STATEWIDE QUALITY SERVICES

Small enough to care. Large enough to deliver.
